PROFESSIONAL PROFILE

Computer Engineer with solid experience in software development, data analysis, and technical support. I specialize in building robust, efficient applications for mobile, web, and desktop platforms. Passionate about technology and constantly seeking new professional challenges.

WORK EXPERIENCE

Grupo Farsiman — Full Stack Developer

June 2024 — Present

- Developed a tender lifecycle tracking platform (go/no-go analysis, offer preparation and submission, adjudication, contracts, deliveries, and collections), complementing processes already managed in SAP Business One.
- Extended the pharmacovigilance platform with a new case reconciliation stage, enabling continuous status updates for adverse event reports.
- Mobile app development with Flutter and Ionic, frontend with Angular, and backend with C# and .NET (versions 7, 8, and 9).
- Data analysis using Power BI and SQL Server.
- Desktop application development with Visual Basic and C#.

AdminSoft-CM Inversiones — Developer & Technical Support

August 2022 — May 2024

- Development of software solutions with C#.
- SQL Server database administration.
- Technical support for users and computer equipment maintenance.

Java Applications

September 2018 — October 2019

- Development of web applications with Java Spring for expense management.
- MySQL database administration.
- Deployment on Apache Tomcat servers.
- Application of Clean Code principles.

EDUCATION

Universidad Tecnológica de Honduras (UTH)

2017 — 2023

Computer Engineering
Magna Cum Laude Distinction — Academic Excellence

Instituto Departamental La Independencia

2015 — 2016

High School Diploma, Sciences and Humanities

HONORS & AWARDS

- Certificate of Recognition, Mathematics Olympiad Committee, 2016
- Magna Cum Laude, Silver Medal, Universidad Tecnológica de Honduras, 2023
